Member: American Chemical Society (ACS), ACS Division: Organic Chemistry; Drug Information Association (DIA). Past Memberships: American Association for the Advancement of Science (AAAS); American Association of Pharmaceutical Sciences (AAPS); Project Management Institute (PMI).

Dear ACS Friends

Thank you for your interest in my candidacy for District II Director. There are several reasons why I hope you will consider me. I've been a life long chemist, from high school on, chemistry was my passion. I began my career as a laboratory researcher at Eli Lilly Company, and about a decade later, moved into general management roles. I have had the privilege to be involved in the ACS all the way, from multiple scientific presentations at ACS meeting, to leading ACS Committees, chairing the Indiana Section, leading the Host Committee for the 2013 Indianapolis National Meeting, and now as Councilor for the Indiana Section.

My ACS service has been dedicated to helping ACS organizations develop long-range vision and strategies, and then following through with robust plans to deliver. The approach always involves broad representation of multiple perspectives and capabilities to achieve organizational goals.

I have a unique background, blending 32 years of industrial experience with an ongoing commitment to academic partnerships, through teaching and strong outreach to multiple academic institutions.

Finally, I have a special interest to increase the diversity and inclusion of the ACS, as exemplified by the transformation of the Women's Chemists Cmte that I led in the mid-1990's.

The ACS has the power to significantly impact the future of chemistry in the world, and I would like to work with District II membership to realize that goal. I will dedicate my service to ACS's top priorities, including the improvement of chemistry education, employment and engagement of our membership & the public.

I would be honored to represent District II on the ACS Board of Director, and would greatly appreciate your vote this fall!
